Avanti satellite technology provides vital connectivity when and where it is needed most.

20
YEARS

of commitment to deliver reliable and highly secure satellite capacity - We guarantee coverage for defence missions, enterprise solutions, and critical public services.

\$1.2
BILLION

invested in the latest Ka-band technology and shaped to meet the communications industry.

245
SCHOOLS

connected to satellite connectivity in Kenya as part of the iMango project.

300
THOUSAND

School children educated and showing improved learning outcomes

1.7
BILLION

people across 118 countries – We believe that everyone should have an equal opportunity to be more secure, empowered, and prosperous.

Avanti African Coverage

75%

of Avanti's investment is in Africa, totalling over \$897 million.

We are the only Ka-band satellite provider with gateways in Nigeria, SA and Senegal.

Together with our trusted network of partners, we deliver programmes throughout Africa that have an impact on education, gender equality, health, security and ultimately communities.

Our proposition is comprised of key components that help overcome the different challenges faced

High Speed satellite connectivity underpins EdTech; Avanti can provide ICT devices and educational content, or work with the Ministry of Education to use existing or planned devices and content.

Core Proposition

Satellite Connectivity

- VSAT equipment
- Internet capacity & connectivity
- Power

ICT devices

- PCs & tables
- Power

Education content

- Learning platforms
- Curriculum content
- Internet resources
